Gregory Skibitsky
(716) 681-6070

Completion Date:
Fall 2003

Construction Value:
\$2.5 million

Key Personnel:
James Frick, PE
Michael Banks, LEED AP BD+C

This project entails the construction of approximately 5,000 square feet in additions to the existing 11,000 square feet facility. In addition to expansion, the project will entail complete renovation to the existing facilities, and a new design aesthetic for the exterior of the building.

The new East Amherst Firehouse is a design that reflects the rich tradition of the fire service in our Country. These architectural design elements are also a sensitive reaction to the immediate community. This structure will encourage a stronger relationship between the neighboring citizenry and the providers of fire protection.

DiDonato Associates provided services including:

- Foundation Design
- Structural Design
- Site Design
- Architectural Design
